Problem licensing RedBack 4.1.3

When licensing RedBack 4.1.3, although the correct authorization code is used, the message regarding the 31 days to license the product keeps being displayed.

When licensing RedBack 4.1.3 using RB.LICENSE, the message that tells you that you have 31 days to license the product still appears even after the code gets accepted.

In order to verify that the product is authorized correctly, you need to exit your UniData/UniVerse session, start a new database session and run RB.LICENSE again and select 5 to display the license details

Here is output that shows this behavior:

```
C:\Redback\UVServer\redback\rbdefn>d:\ibm\uv\bin\uv
UniVerse Command Language 10.0
(c) Copyright IBM Corporation 2001. All rights reserved.
rbdefn logged on: Fri Nov 01 16:01:27 2002

>RB.LICENSE
------------------------------------------------------------------------------
--
RB.LICENSE [Version 1.1]

This program will license RedBack from the RBDEFN Administration Account

Actions:
  1: Enter license details (new installation)
  2: Amend license details (existing installation)
  3: Enter authorization code
  4: Enter violation authorization
  5: Display license details

You must first provide a valid RedBack User Id and Password to proceed.

RBHOME=C:\Redback\UVServer\redback
------------------------------------------------------------------------------
--
RedBack User Id :RBADMIN
Password        :*******
Please note, you have 31 days left in which to receive and enter your RedBack
licence number.
If you have not sent your licence details to your IBM support office, please
do so as soon as possible.
