

UniVerse Replication Logs at 10.2

Abstract

UniVerse Replication was re-written at 10.2 to have several security improvements and speed improvements.

Solution

UniVerse Replication was re-written at 10.2 to have several security improvements and speed improvements. In order to fully gain the benefits from these improvements, any replication logs / log information that exists prior to loading 10.2 need to be deleted, so that 10.2 will create new logs allowing the new functionality to work correctly
