

TCL command UPDATE.INDEX may fail after installing UniVerse 10.3.0 on AIX 5.3

Abstract

TCL Command UPDATE.INDEX UV.TRANS FILE fails with the following error:

```
Locking 'UV.TRANS' file for exclusive use.  
Starting SSELECT for file 'UV.TRANS index FILE'.  
Compiling "@INDEX.FILE". @Ak.0 ; @1 : ( char ( 251 ) ) : @Ak.ID  
exec(): 0509-036 Cannot load program tsort because of the following errors:  
0509-130 Symbol resolution failed for tsort because: 0509-136 Symbol  
__pthread  
(number 228) is not exported from dependent module  
/usr/lib/libpthread.a(shr_xpg5.o).
```

Content

UniVerse 10.3.0 requires a minimum AIX OS version and patch level of 5300-08

Perform the following command at the UNIX shell prompt::

```
oslevel -r
```

If the result shows anything less than "5300-08", then you must upgrade AIX before UniVerse can work.
