To contact Rocket Software by telephone for any reason, including obtaining pre-sales information and technical support, use one of the following telephone numbers.

Country and Toll-free telephone number

- United States: 1-855-577-4323
- Australia: 1-800-823-405
- Belgium: 0800-266-65
- Canada: 1-855-577-4323
- China: 400-120-9242
- France: 08-05-08-05-62
- Germany: 0800-180-0882
- Italy: 800-878-295
- Japan: 0800-170-5464
- Netherlands: 0-800-022-2961
- New Zealand: 0800-003210
- South Africa: 0-800-980-818
- United Kingdom: 0800-520-0439

Contacting Technical Support

The Rocket Community is the primary method of obtaining support. If you have current support and maintenance agreements with Rocket Software, you can access the Rocket Community and report a problem, download an update, or read answers to FAQs. To log in to the Rocket Community or to request a Rocket Community account, go to www.rocketsoftware.com/support. In addition to using the Rocket Community to obtain support, you can use one of the telephone numbers that are listed above or send an email to support@rocketsoftware.com.

Release Notes

What's new in 6.6.3

The following enhancements were made in SB/XA 6.6.3.

Issue Number	Description	Component
SBXA-16900	When Report Writer output is to DIF format and no records are selected, the error NO DETAIL LINES CREATED can now be suppressed by setting /SB.PARMS > Reports > Suppress NO DETAIL LINES CREATED Message For DIF Output to Yes . Previously, this error required user input, disrupting batch processing.	Reporting
SBXA-21089	<p>To enable MX Workbench to identify SB application screens, the new VT220MX terminal type displays a unique screen identifier on the 25th line for the following screen types:</p> <ul style="list-style-type: none">• Dialogs• Menus• Input/Output Screens• Reports• Selection Screens <p>This feature is not available when using other terminal types.</p>	MV-MX

What's fixed in 6.6.3

The following issues were addressed in this release.

Issue number	Description	Component
SBXA-20825	In XUI mode, right-justified grid fields containing data longer than the display width of the field now prompt for input from the left, instead of the right, when given focus.	MultiValue Grids
SBXA-20862	When using terminal emulators other than SBClient, for example wIntegrate or Putty, SB/XA no longer stops for input before a password challenge.	Security
SBXA-21088	The TUBP script routines now successfully export data to Excel after an XUI theme change.	XUI Rich Client
SBXA-21095	SB.DISP type 9 messages no longer add unexpected control characters to the end of the displayed message when using ANSI emulations in SBClient.	SBClient

Issue number	Description	Component
SBXA-21120	When changing an XUI theme, the ribbon menu now displays correctly. You no longer need to reload the theme to redisplay the ribbon menu.	XUI Rich Client
SBXA-21134	Login with data stacked credentials is now seamless. Previously, credentials data stacked from a program called by the LOGIN proc required user input.	Security
SBXA-21164	Report Writer output to DIF format generates reports with no erroneous empty line on line 1 and display as expected. Report headings are no longer pushed to line 2 in error. Previously, line 1 was empty when the DIF output was sent to a UniData directory type file.	Reporting
SBXA-21200	In XUI mode, unassigned COMMON variables no longer display when calling a screen for the first time from a ribbon menu.	XUI Rich Client
SBXA-21214	GUI forms no longer shift position four pixels down and to the right when /USER.FLAGS > GUI Prefs > Center GUI Screens is set to <i>N</i> .	SBClient
SBXA-21229	In SB+ Paragraph processes, you can now concatenate two multivalued variables correctly. Previously, two concatenated multivalued variables did not correctly interleave and instead were strung together.	Reporting
SBXA-21314	In Windows 11 version 24H2, the default behaviours for horizontal scrollbars changed. SBClient now correctly enables horizontal scrollbars in GUI mode.	GUI forms/functions/ SBClient
